

Protect internal components from theft and tampering with the Chassis-Lok™.

The Chassis-Lok™ is the affordable heavy-duty solution that will save you possibly thousands of dollars in component loss and user down time. Chassis-Lok™ protects the interior of your computer by limiting access to a chassis screw.

The Chassis-Lok™ is easy to install. Remove one cover screw on your CPU, apply the “Super Bond” adhesive and position it over the cover screw hole. Replace the cover screw and secure with the Chassis-Lok™ cover.

By mounting the device to the chassis using our “Super Bond” adhesive this product is many times stronger than products that just mount using the cover screw. The high security lock is pick and drill resistant. For maximum security it is recommended that 2 devices be used per computer. Custom keying options are available.
